

 **BERTOLOTTI S.P.A.**

BERTOLOTTI spa is a mechanical and plant engineering company active, since 1972, in the following sectors:

MINING / IRON & STEEL / RAILWAY
FOUNDRY / HARBOURS
POWER PLANTS / RESEARCH
AERONAUTICS / NUCLEAR PLANTS

The initial activity of the company was concentrated on the production of materials handling equipment for the mining industry.

This early experience spread over the steel industry in those areas where material handling is involved: harbours / stockyards (iron ores and coal) / cokery / sinter plants / blast furnace / steel making plants (EAF / LF / converters).

Further more, BERTOLOTTI started to manufacture handling & packaging equipment for strip products in hot and cold rolling mills.

IRON AND STEEL INDUSTRY /
BULK MATERIALS HANDLING

HOT & COLD ROLLING MILLS LOGISTICS:
transport, handling, storage

STRIP PRODUCTS PACKAGING:
packaging lines
packaging elements manufacturing lines

AERONAUTICS
assembly platforms
jigs
aircraft's parts handling systems
manufacturing solutions development
NUCLEAR
low radioactive waste management solutions
handling systems
automatic warehouses

BULK MATERIALS HANDLING:
complete Fe-alloys
and additives charging systems
weighing and dosing
stackers and reclaimers
ship loading and unloading systems
conveying and handling equipment:
belt conveyors, elevators,

LADLES HANDLING AND CASTING SYSTEMS
ladles handling and large-ingots casting facilities
ladles transfer cars
ladles tilting/lifting equipment

RAILWAY MAINTENANCE WORKSHOPS
mobile Lifting Jacks
(Single Vehicle lifting plant)
fixed Sand Filling Plants
mobile Sand Filling Plants
fixed working platforms for roof maintenance
mobile working platforms for
train sides maintenance
dual mode cars for
mounting/dismounting under-case assembly
bogies and Axle drop plants
auxiliary bogie cars
painting plants (for bogies and vehicles)
washing plants (for bogies and vehicles)
turntables for vehicle maintenance

BERTOLOTTI spa adopts an integrated management system according to the following norms: ISO 9001, EN AS 9100, ISO 14001, BS 18001 OHSAS, ITAR COMPLIANT. This is in order to achieve excellent objectives concerning the quality, the environment and the safety of its workers.

BERTOLOTTI spa considers the continuous improvement of its process, as well as the system for the integrated management, one of the key vehicle through which it develops its business.

The Company intends to remain at the forefront concerning the developmental process of the market, updating constantly its offer and its systems for the Client, defining and describing its services accurately.

BERTOLOTTI spa commits to promote the comprehension and the diffusion of its battle for

the quality to its personnel in order to let it be visible both in the workstation and abroad by means of on and off-line publications.

The general principles and objectives accord to the in force norms in Countries where Bertolotti spa is working.

BERTOLOTTI spa considers that the correct management of the environment subject and needs and expectations of the Clients (Countries, territory) - including the health and safety on workplace - a primary and essential key condition for its improvement, declaring its commitment concerning its management and maintenance.

The application of these fundamental principles is given to the Quality-Safety Department, whose task is monitoring and updating constantly the developmental process, qualified and measurable for each level, function or business process.
